**CCC (Cargo Carrying Capacity)** is the amount of weight available for fresh potable water, cargo, passengers, additional optional equipment and accessories. CCC is equal to GVWR minus UVW. Available CCC accommodate fresh potable water (8.3 lbs per gallon). Before filling the fresh water tank, empty the black and gray tanks to provide for more cargo capacity. 

**Estimated Average Based on Standard Build Optional Equipment.**

**Forest River Information**

- The load capacity of your unit is designated by weight, not by volume, so you cannot necessarily use all available space when loading your unit.
- Actual towing capacity is dependent upon your particular loading and towing circumstances, which includes the GVWR, GCWR and GCWR as well as adequate trailer brakes. Please refer to the Operator’s Manual of your vehicle for further towing information.

---

**Dynamax RV Information**

- Each Dynamax RV is weighed at the manufacturing facility prior to shipping. A label identifying the unloaded vehicle weight of the actual unit and the cargo carrying capacity is applied to every Dynamax RV prior to leaving our facilities.
